

Lots of forms when starting school?

The new ***Start School service*** makes life easier!

We've just made things easier for you. We've got rid of all the forms for contact details and consent when your children start school. Now you just use Vklass to update your contact details and consent for your children.

How do I access Vklass?

As guardian you will automatically be given an account in Vklass, and you log in using your mobile BankID. The information your school will send you before the start of term will include information about how to log in. That information is also available on skovde.se.

I have a new mobile phone number/email address

You can update your contact details in Vklass at any time during the school year.

I don't use mobile BankID, how can I submit my contact details and consent?

Speak to your preschool's or your child's mentor, the school administration, Medborgarservice in Södra Ryd, or Skövde municipality's contact centre, and they will help you.

I want to change the consent I gave earlier – how do I do that?

You can update your consent in Vklass at any time during the school year.

My child is turning 18, does that change anything regarding my contact details?

When your child has turned 18, s/he is responsible for adding contact details to his/her next of kin in Vklass.
